

Folding Cleats and Shroud Cleats

Supplied By:
American Rigging Supply, Inc.

Toe Rail Folding Cleat

The toe rail folding cleat makes a perfect movable, mid-ship cleat for spring lines, etc. This cleat is mountable on all aluminum toe rails. The rail is protected by a silicon rubber pad for rattle free installation. The cleat folds out of the way when not in use, the husky 3/8" dia. cleat assures strength. The complete unit is T-316 stainless. Fits most symmetric and asymmetric aluminum toe rails. Safe Working Load = 2000 lbs.

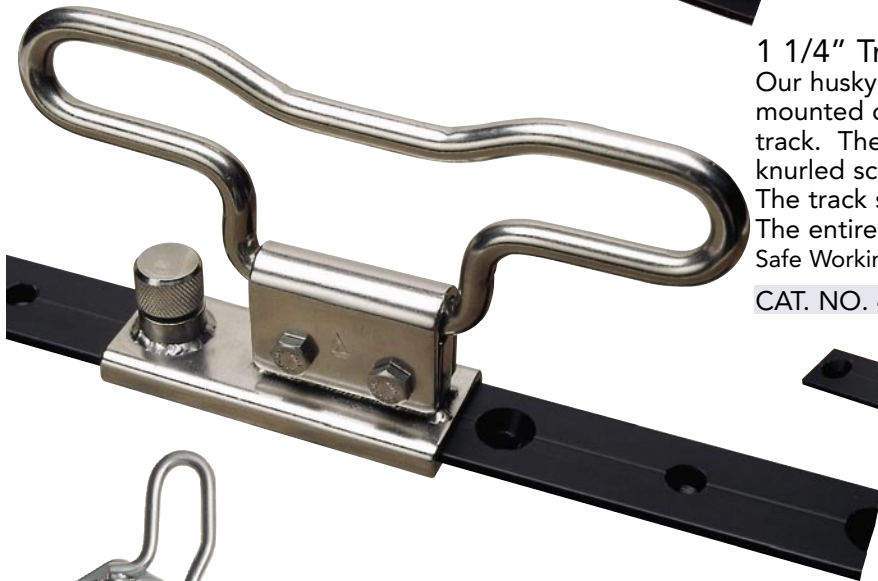

CAT. NO. 48-510 \$80.75 Patent #DES.401,842

1 1/4" Track Mounted Folding Cleat

Our husky 3/8" dia. folding cleat is now available mounted on a sliding stainless steel car for 1 1/4" track. The folding cleat is 8" long and features a knurled screw pin for adjustment along the track. The track surface is protected with a teflon/fiber strip. The entire unit is made from T-316 stainless steel. Safe Working Load = 2000 lbs.

CAT. NO. 48-511 \$120.25 Patent #DES.401,842

Neat Cleat

An exceptionally strong and functional folding cleat. A friction drag insures that the cleat will stay either up or down as required. The open construction not only allows a conventional hitch but dock lines with a loop may be passed through with a "bite" around the ears. Halyards, guys and sheets may be snapped on even when the cleat is in use. This 8" cleat will handle up to 5/8" lines. Use four (4) 5/16" bolts to fasten. (Not supplied)

CAT. NO. 48-508 \$44.75
Safe Working Load = 2000 lbs.

Shroud Cleat

All stainless steel construction, compatible with your stainless steel rigging. Will not corrode. The JOHNSON SHROUD CLEAT is easily attached to 5/32" thru 3/8" dia. wire or rod. Ideal for flag, radar reflector and steaming shape halyards with an eye for attaching a snap shackle. Low profile, projects only 1/2" from shroud.

CAT. NO. 40-518 \$18.00
