

Leather Wheel Rim Covers

Edson Deluxe Leather Wheel Covering Kits.

Give your wheel the ultimate feel! Edson's do-it-yourself Leather Wheel Covering kits look great and make any wheel softer and warmer to the touch. Each kit includes a pre-punched leather cover, double sided sticky tape, thread, needle and complete instructions. Measure the diameter of your steering wheel and choose from the ordering guide below. Available in Buck Tan or Dove Gray. *Wt. 1.5 lbs (.68 kg).*

Edson Deluxe "Comfort Grip" Leather Wheel Covering Kits.

Create your own luxury steering wheel with Edson's exclusive "Comfort Grip" Leather Wheel Covering Kit. "Comfort Grip" cushions the wheel and has contoured finger grips on the inside of the wheel rim. Measure the diameter of your steering wheel and choose from the ordering guide below. Available in Buck Tan or Dove Gray. *Wt. 2.2 lbs (1 kg).*

Great Gift Idea!

Only Edson uses Orthopedic Grade Cowhide - considered to be the highest quality leather available. It stays supple even when subjected to harsh marine environments!

IDEA

LET EDSON DO THE JOB FOR YOU!

When ordering a new wheel, request an Installed Leather Cover or send us your existing wheel, and Edson will install the Leather Wheel Cover for you—we will even provide a loaner wheel up to 40". See Ordering Guide below for information.

Please Note: The Buck Tan Wheel Cover is dyed leather. To retain the tan color of the leather wheel covers, Edson recommends a complete wheel or pedestal cover for protection from the elements.

Wheel Adapters

Edson's Wheel Adapter is a real problem solver. Made of brass and finished with a stainless locking pin and a 1/4" stainless wheel key, the adapter is ideal for installing Edson wheels on other steerers. It's simple and it's strong. Be sure to tell us the make and model of your steerer. Call Edson Customer Service and request Engineering Bulletin EB-95-214-2 for information on the correct adapter for your steerer. Suitable for wheels up to 30" (76cm) diameter. **Edson Wheel Adapter - Order #698** (See Price Page for sizes).

Edson's Wheel Flange Adapter allows Edson's lightweight Diamond Series and Carbon Fiber flanged mount steering wheels to mount directly onto Edson's tapered Wheel Shafts. It is recessed to allow room for tightening the wheel nut and can be used with Edson's convenient Thru-Shaft Wheel Brakes. Investment cast and polished 316 Stainless. *Wt. 2 lb (.9 kg).* **Wheel Flange Adapter - Order #698FL** (See price page for sizes).

Wheel Nuts

Attention to detail is the keynote of these Edson Wheel Nuts. Available in highly polished Investment Cast 316 Stainless or traditional Polished Brass. Measure your steering shaft thread for the correct size.

- Stainless Wheel Nut with 1"-14 Shaft Threads - Order #673ST-1-14**
- Stainless Wheel Nut with 5/8"-18 Shaft Threads - Order #673ST-5/8-18**
- Stainless Wheel Nut with 3/4"-10 Shaft Threads - Order #673ST-3/4-10**
- Stainless Wheel Nut Kit (for 1", 5/8", 1/2" & 12mm) - Order #673ST-KIT**
- Brass Wheel Nut with 1"-14 Shaft Threads - Order #673BR-1-14**
- Brass Wheel Nut with 5/8"-18 Shaft Threads - Order #673BR-5/8-18**
- Brass Wheel Nut with 3/4"-10 Shaft Threads - Order #673BR-3/4-10**

Stainless Wheel Nut #673ST

Brass Wheel Nut #673BR

Quick Release Wheel Nuts

Want to get your wheel out of the way to give you more room in your cockpit at anchor or at the dock? It's easy with Edson's New Quick Release Wheel Nut. Simply give the knurled knob a few turns and pull the wheel off the shaft. No need for other tools or wrenches. Large 2 1/2" diameter provides easy grip. Highly polished Investment Cast 316 Stainless has superior strength as well as good looks. *Wt. 1 lb (.45 kg).*

- Quick Release Nut with 1"-14 Shaft Threads - Order #826ST-1-14**
- Quick Release Nut with 5/8"-18 Shaft Threads - Order #826ST-5/8-18**
- Quick Release Nut with 3/4"-10 Shaft Threads - Order #826ST-3/4-10**

IMPORTANT!

Important Ordering Information

Many Edson pedestals produced after January 2000 use wheel nuts with 5/8"-18 shaft threads; Edson pedestals built from 1979-1999 use wheel nuts with 1"-14 shaft threads; Edson and Yacht Specialties Pedestals dating prior to 1979 use wheel nuts with 3/4"-10 shaft threads. If your boat was built on or around the year 2000, please check the measurement of your shaft carefully.

Wheel Storage Device

Now available for Tapered Hubs!

Great Gift Idea!

Make more room in your cockpit when you're not sailing! Enjoy a large wheel when sailing but it takes up too much room in the cockpit when you are at anchor or at the dock? Take your wheel off and store it out of the way with Edson's Wheel Storage Device. Investment cast 316 stainless, polished to a mirror finish, Edson's Wheel Storage Device can be mounted vertically or horizontally to any 1" or 1 1/4" diameter pushpit, railing or stanchion. Check your wheel for a straight or tapered hub. **Straight Hub Wheel Storage Device Only - Order #683-15**
