## HOYT JIB BOOM™ (Patented)

As your boat bears off downwind, and sheets are eased, the Hoyt Jib Boom™ maintains precise control of the jib's leach. This results in remarkable performance improvement and ease of handling.

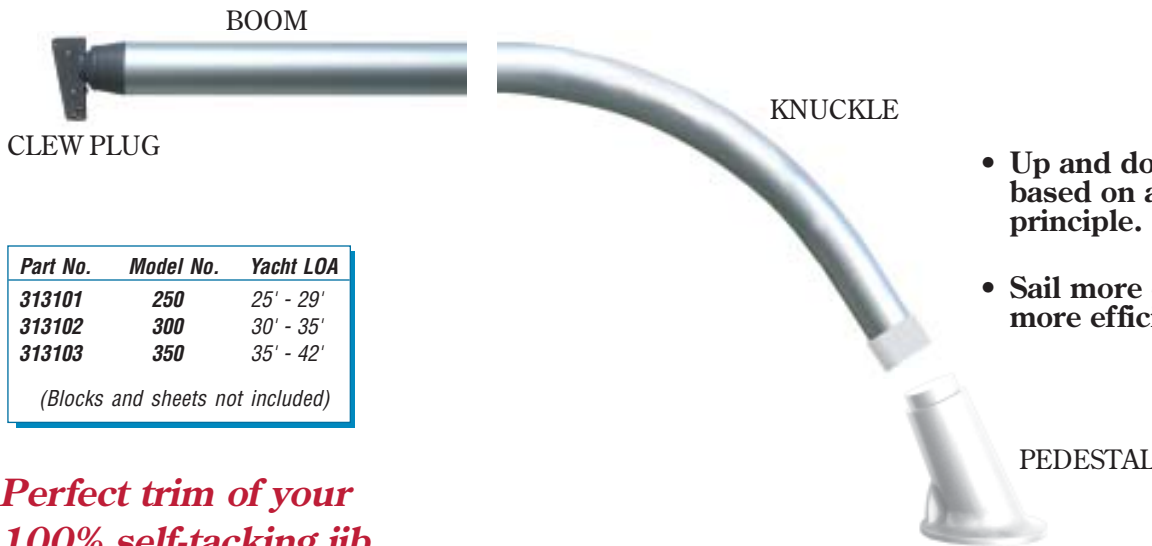

**Proven on over 1,000 sailboats and numerous transoceanic passages**

- **Leach twist perfectly trimmed downwind**

Courtesy of Alerion Yachts

*"The Hoyt Jib Boom™ is one of the best cruising innovations I have seen or used."* Ken Read V.P North Sails

- **Up and downwind jib control based on a simple & effective principle.**
- **Sail more easily and more efficiently!**

Part No.	Model No.	Yacht LOA
313101	250	25' - 29'
313102	300	30' - 35'
313103	350	35' - 42'

(Blocks and sheets not included)

**Perfect trim of your 100% self-tacking jib Wing and Wing downwind**

*"Hundreds of Island Packets with these Hoyt boom™ staysail rigs have now logged countless miles cruising worldwide in all varieties of conditions. I'd be hard pressed to improve on any aspect of this setup and would heartily recommend it to all cruising sailors."*

Bob Johnson - President/CEO  
Island Packet Yachts

**• Winner of SAIL Magazine award for Rigging Invention of the Year!**

- **Self tacking upwind**

# HOYT JIB BOOM™ SPECIFICATIONS

PART NUMBER	MODEL NUMBER	TUBE DIAMETER	KNUCKLE LENGTH	BOOM TUBE LENGTH	SUGGESTED MAXIMUM 'J'	'A' DIMENSION	BASE DIAMETER
313101	MODEL 250	2.0" OD	2.25'	6'	10'	14"	7"
313102	MODEL 300	3.0" OD	2.50'	11'	13'	17"	8"
313103	MODEL 350	3.5" OD	2.75'	13'	17'	21"	8-3/4"

The typical pedestal base placement (center of the pedestal base) is 10% aft of the headstay. This is not a critical location, but rather a "Rule of Thumb". Various obstacles can obstruct the pedestal base position. All knuckles are bent to 57°.
