

# tiller extensions

Supplied By American Rigging Supply, Inc.

## EA & EJ

unique helming precision

two handle styles,  
four standard lengths, all telescopic

The right tiller extension can make a big difference to your comfort and performance.

Designed for the hardest conditions our tiller extensions reduce the strain and increase the sheer enjoyment of helming a boat  
Used on Open 60s, Figaro and Mini Transat boats

### asymmetric grip EA

#### EA asymmetric features

Asymmetric extension improves helming performance in three ways:

More feedback - for accurate and precise control

**More mobility** - maintains the best helming position for optimum trim and visibility

**Less fatigue** - correct helming position reduces back pain and improves concentration

Asymmetric grip fits the hand better and supports the wrist

Two handed helming mode lets the arms relax into a more comfortable, elbows-down position

**Push-button** adjustment, Torlon™ ball locking mechanism

Strongly engineered stainless steel swivel joint for precise universal movement

**Fast pin** for easy stowage

Integral shock absorber

For more grip use EA/900SG or add E-GRIP to upgrade

boat control

EA & EJ Stainless steel swivel

Supplied By American Rigging Supply, Inc.

## parallel grip EJ

### EJ parallel grip features

All the features of the asymmetric but with a slimmer grip  
The **compact solution** for the smaller cockpit and ideal for hiking and **fast tacking**

Upgrade EJ grip to asymmetric handle specification-or vice versa with EA-HDL or EJ-HDL simply by removing two socket screws

### UPGRADE TIP

Consider the Diabolo version preferred by **single-handed** yachtsmen. A windsurfing style universal joint returns it to a vertical position when not in use. Fit E-DIABOLO accessory to upgrade a standard EA or EJ extension to this specification.

See page 27 for accessories.

### EA & EJ Diabolo

### specifications

Asymmetric	Parallel	Length Closed	Length Extended
EA/900S	EJ/900S	600mm (23 5/8")	900mm (35 7/16")
